Weather Forecast / Pronóstico del tiempo

For this project, the teacher will assign you a season and you will create an oral presentation with a visual in order to tell the class the weather forecast for the next five days. You will need to include the following in your oral presentation:

1. At least 10 different weather vocabulary words (hace sol, primavera, estación, etc.)
2. At least 5 different calendar vocabulary words (lunes, martes, abril, mañana, etc.)
3. A visual of your weather forecast for the next five days (can be a poster or powerpoint)
4. A greeting and farewell (hola, buenos días, hasta luego, adiós, etc.)

Example of a visual:

lunes	martes	miércoles	jueves	viernes
				

Your oral presentation **must be memorized** and will need to be 1-3 minutes long. You must submit a neatly written or typed script to the teacher before you present your oral presentation to the class on **Thursday, December 1, 2016**.

Extra credit for extra creativity! Feel free to bring in props to spice up your weather forecast!
